Instantly Transfer ADT, Allergies, Diet Orders and resident photos from PointClickCare to MealSuite's All-In-One Foodservice Solution

Eliminate Data Entry Risks

Improve Mealtime Safety

Boost Staff Efficiency

Deliver Personalized Care

About MealSuite's Integrated Foodservice Technology

MealSuite is a fully integrated, end-to-end, dietary, food production, inventory, kitchen management and Point of Sale solution. Trusted by 2,800+ senior living and healthcare communities across North America – our industry-leading technology helps save staff time, reduce waste, mitigate risk and meet regulatory requirements.

> *The operational efficiencies from having MealSuite integrated with PointClickCare gives my team peace of mind and allows them to spend more time focusing on what matters most... Improving the quality of life for our residents.* **- Food Service Director & Client of 16 Years**

⊘ Improve Staff Efficiency

Connect's real-time transfer of profiles reduces stress & time required to re-key data. Timely data drives efficiency when taking tableside or bedside orders.

⊘ Access Real-Time Allergens & Diets from Anywhere

See real-time diet restriction and allergen information when taking orders or delivering snacks; residents are only offered items appropriate to their medical needs.

⊘ Deliver a Personalized Mealtime Experience

Preferences can be entered into the system for requests like portion size adjustments, item substitutions, dislikes and even personalized menus. Plus, help your service team support diners by entering notes like: special utensils or assistance required.
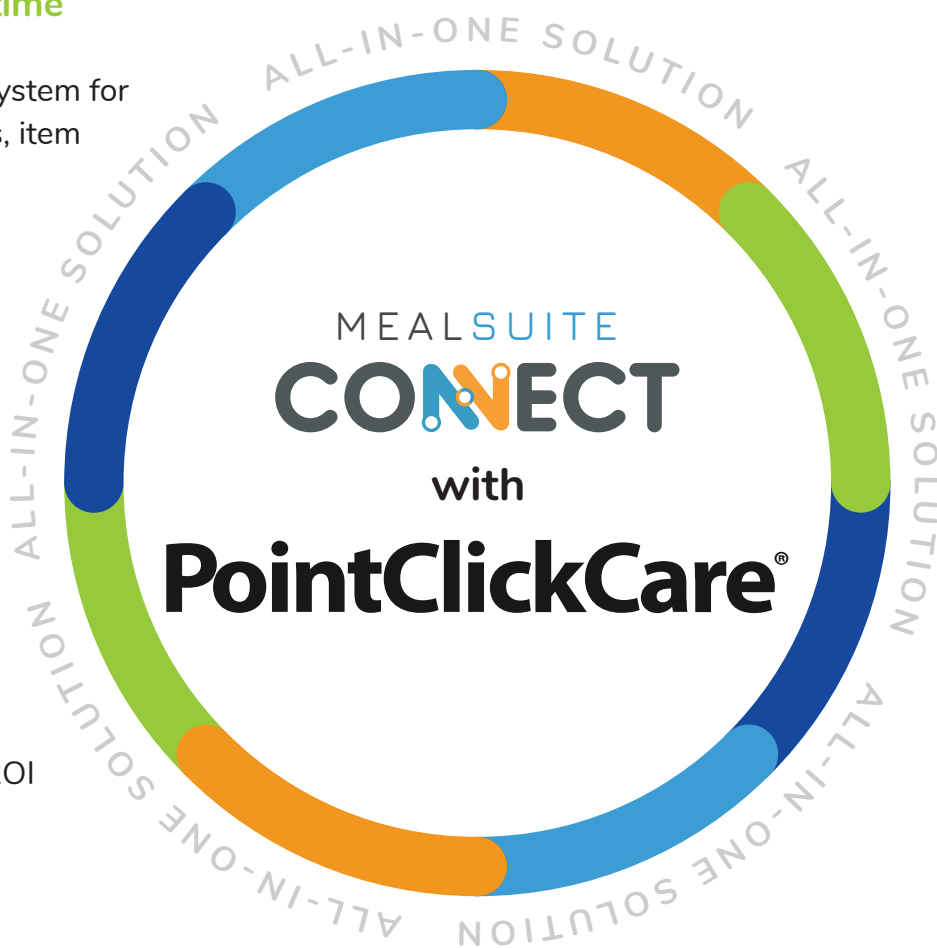

⊘ Rapid Go-Live with Starting Menus

MealSuite's dietitians publish two menus a year (4-week cycles) that can be used directly or with your own tweaks; or create your own menus if you like! Either way, starting menus shave weeks off your rollout time and help your team achieve an ROI in record time.

⊘ Empower Your Staff with Actionable Data

Connect delivers actionable data to your dietary, food production and even nursing teams that help them make decisions about resident care, cost savings and more.

⊘ Fully Integrated Dietary and Point of Sale Solution

MealSuite provides a seamless solution so resident and dietary parameters flowing from PointClickCare are available at tableside and integrated with your ordering system and Point of Sale (POS). Eliminate the need for multiple integrations with dietary, food production and POS vendors.
