

NEW!

Manage Reservations Across Your Dining Locations with MealSuite's Point of Sale System

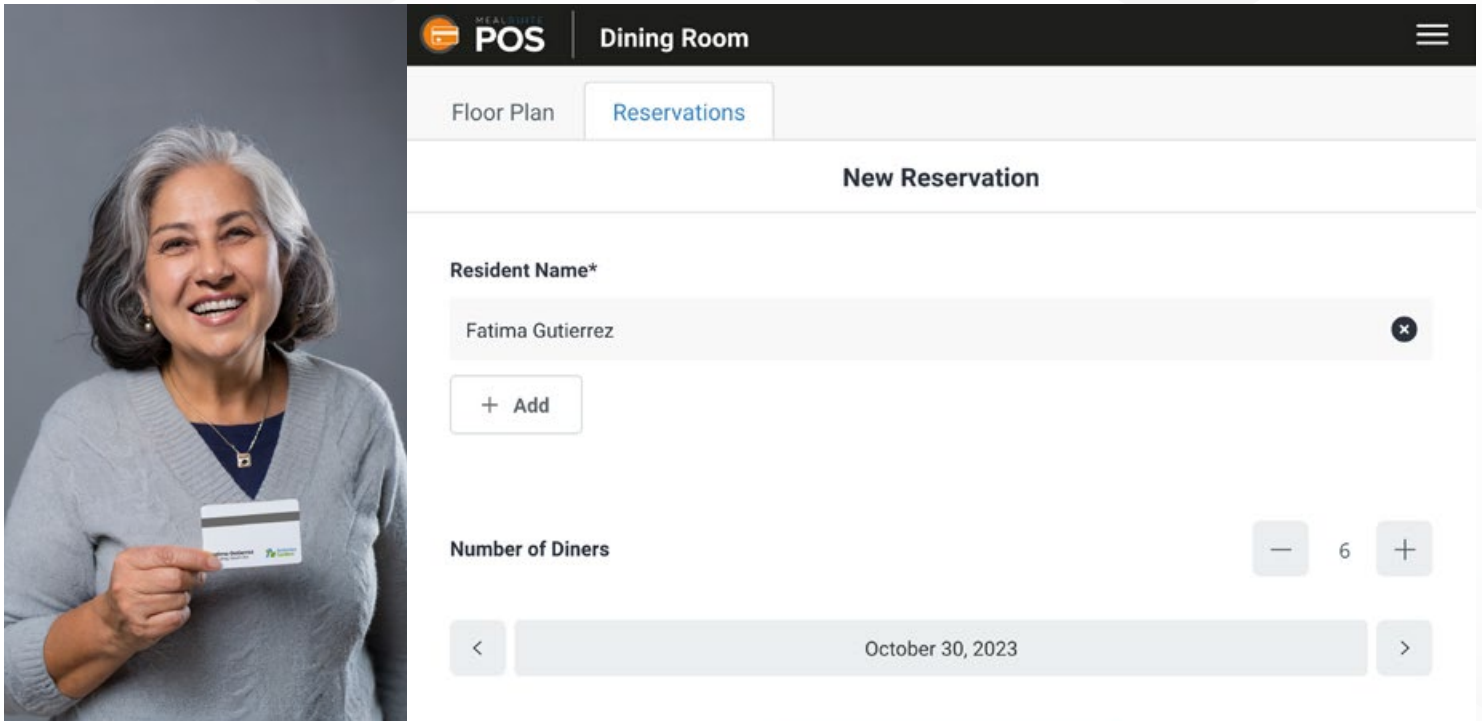

Book, Modify or Cancel Reservations with The Dining Room Dashboard

- Allow residents or their families to request bookings in person at your host stations or by calling in. Hosts or your concierge can use the dashboard to view and book available tables, including alerts when you're near capacity.
- Tailor settings to your needs such as the maximum number of reservations for time slots.

Perfect for operations of all shapes and sizes, the reservations feature can support single dining room locations and multi-venue.

Connect With Your People Data

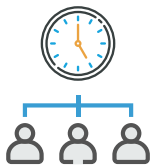

Reservations are fully integrated with your People Profiles, so resident information can be pulled up when making a booking. Residents can even be assigned to a table by simply scanning their badge or RFID.

Why Consider Taking Reservations?

Stagger Traffic Flow for Improved Efficiency

Are mealtime “peak hours” overwhelming your team? Reservations help ensure an even, predictable flow of residents, minimizing congestion, and providing a smoother dining experience for all.

Accurately Allocate Staffing

Know ahead of time which dining locations and times will see the most traffic, so you can schedule the appropriate number of team members, know when staff can go home early, etc.

Better Predict Food Quantities

Visualize mealtime attendance and dining room capacity to better predict production needs and save on food waste.

Reservations is FREE for all MealSuite Point of Sale customers who sign up prior to Jan 1st 2024. Contact Sales@MealSuite.com to learn more!
