Older Adults & Gut Health: A Guide for Dietary Professionals

The "gut" is comprised of the stomach, intestines, and colon – this is where food is digested, nutrients are absorbed, and the body rids itself of waste.

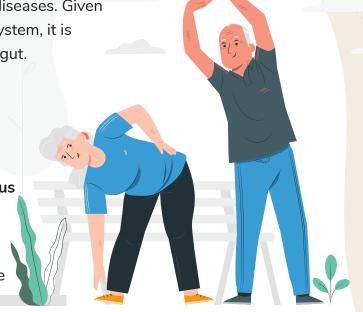

- The bacteria and other micro-organisms in the gut are known as the gut microbiome. These
 help break down food, turning it into nutrients the body can use
- Gut microbiome is affected by what you eat, so it's important to provide the gut with the right fuel
- Research has shown that gut health can be linked to the immune system, mental health, autoimmune diseases, sleep, cardiovascular diseases, endocrine disorders such as type 2 diabetes, and gastrointestinal disorders such as IBS

How does aging affect gut health?

As we age, immune function can decline, putting the older population at risk of developing infections and other diseases. Given the correlation between gut health and the immune system, it is especially important for seniors to maintain a healthy gut.

- Older adults are often on multiple medications
 which can affect the gut microbiome
- Suboptimal dental health in seniors can cause chewing difficulty, limiting the variety of nutritious foods in the diet
- Decreased physical activity can slow digestion, may decrease blood flow to the gut, and can cause other issues such as constipation

Tips for supporting gut health in older adults

Serve prebiotic foods

Fiber-rich foods help foster growth of beneficial bacteria in the gut. Fiber also helps to regulate bowel movements by moving food through the GI tract and sweeps any "bad" bacteria with it.

Senior-friendly prebiotic foods may include:

- ✓ Oatmeal
- ✓ Bananas
- ✓ Whole grains
- ✓ Beans and legumes

Incorporate probiotic foods

Probiotic foods contain live bacteria that are beneficial to the gut.

Senior-friendly probiotic foods may include:

✓ Yogurt with live and active cultures

Kefir ✓ Sourdough bread Cheeses

Kimchi ✓ Miso Sauerkraut

Supporting seniors with chewing and swallowing difficulties:

- Offer fruit and vegetable blended smoothies (remember to include the pulp), and add some yogurt to increase the "good bacteria"
- Yogurt and kefir are rich in certain types of bacteria that have shown to decrease inflammation, and as a result, a number of chronic conditions
- Serve soft foods including fruits, vegetables, legumes, bean soup, etc. This will provide good sources of nutrition for those with chewing difficulties
- Add a fiber supplement to be taken with water or added to juice, soup or other liquid or soft foods. Always ensure adequate fluid with fiber-rich foods to help maintain a healthy gut and bowel function
